LIMS Administrator/Specialist

Department: QC

Hours per week: 37.5

Basis: Permanent

Job Purpose

The LIMS Specialist is responsible for developing, leading, organising and managing the Labware LIMS System in a GXP environment for the QC Laboratories in order to work towards improvement ensuring compliant data flows.

Key Responsibilities

- Maintaining and developing a robust LIMS system in a GxP environment together with the current LIMS administrator and LIMS super users.
- Provide 1st/2nd level support for resolution of LIMS problems with close collaboration with the IT Helpdesk and LabWare (EU support)
- Improve operational performance by bringing manual workflows into LIMS and bridging LIMS to other lab management systems and equipment
- Implementing LIMS functionalities to build smart and efficient workflows for the lab of the future as part of our future vision
- Supporting colleagues by ensuring timely and accurate access to data.

Knowledge, Experience & Skills Required

- In depth knowledge of Labware LIMS, ideally within a similar role.
- IT or Science background with some IT experience
- Knowledge of installation, configuration, support and maintenance of Labware LIMS
- Able to translate operational needs to digital workflows

If you are interested in this role, a job description is available on request.
