QC Team Leader – Biochemistry

Department: QC

Hours per week: 37.5

Basis: Permanent

Job Purpose

As the Team Leader for Biochemistry, you will be responsible for managing and leading a team of skilled and experienced QC Scientists. You will oversee all Biochemistry tests (Elisa, SDS-PAGE, Western Blotting and other immune assays) performed on the allergen product portfolio.

Key Responsibilities

- Line management of the Biochemistry team with accountability for the approval of technical documents
- Working with the other Team Leaders to ensure Health and Safety in the QC labs, reviewing processes on a regular basis ensuring GMP compliance, continuous improvement and alignment with quality systems
- Overseeing the planning, coordination and tracking of workload and processes for team to ensure optimisation and collaboration
- Acting as point of contact for requests coming into the Biochemistry team
- Participating in problem solving / root cause analysis
- Tracking and reporting progress against metrics, escalating issues to QC Manager where applicable
- Setting direction by clarifying mission and purpose and translating department goals into team activities
- Recruitment and development of the team, ensuring all team members have development plans
- Routinely works close with Quality Assurance, Manufacturing, Validation, Stability, Method Development and other key stakeholders

Knowledge, Experience & Skills Required

- A degree in Biochemistry or similar
- Strong background within a team leadership role managing a QC lab team in a GMP regulated environment
- Experience of performing Biochemistry tests (e.g. Elisa, SDS-PAGE)
