## Senior Clinical Development Physician

Department: R&D  
Hours per week: 37.5  
Basis: Permanent

### Job Purpose

To serve as the responsible physician for assigned clinical programs and clinical trials at ATL.

### Key Responsibilities

- Medical Monitoring and provision of medical oversight for assigned Allergy Therapeutics studies (including 24 hour medical monitoring as required)
- Review of eligibility and safety data entered on the electronic case report form, including review of adverse events and concomitant medications
- Responsible for the conduct of the Trial Oversight Committee, Adjudication Committee, Data and Safety Monitoring Board and other applicable safety review meetings for assigned clinical programs
- Working in close collaboration with the Clinical Development and Safety Associate in the production and review of applicable study documents (e.g. DSMB charter, TOC charter, AC charter, etc)
- Actively contributing to and/or leading the end-to-end clinical development strategy for assigned clinical programs.
- Contribution to and/or leading the clinical trial design discussions for assigned clinical programs.
- Developing and maintaining relationships with program counterparts in Commercial, Chemistry Manufacturing and Controls (CMC), Science, Medical Affairs, Marketing and other ATL departments and acting as a clinical point of contact for senior management and senior level matrix teams
- Contributing to the implementation and embedding of strategic initiatives and various organizational initiatives in the Clinical Department
- Delivering scientific presentations at multidisciplinary internal and external scientific meetings
- Maintaining up to date knowledge on therapeutic area, current regulations and guidelines in order to support the Clinical Department team via mentoring and coaching for matrix team member

### Knowledge, Experience & Skills Required

- Relevant degree with registration (with applicable Medical Council)
- Experience in the clinical development area and/or experience as a Clinical Development Physician (formerly Clinical Research Physician)
- Experience as a Principal Investigator of Investigational Medicinal Products (IMPs) in man (Phase 1 / Early Clinical Development experience is highly desirable)
- Experience in Respiratory Medicine and/or Allergy Medicine would be beneficial.
