QC Laboratory Technician

Department: QC
Hours per week: 37.5
Basis: 6-month fixed term contract

Job Purpose

The QC Laboratory Technician will provide administrative and laboratory support to our QC functions (Chemistry, Components, Biochemistry and Microbiology)

Key Responsibilities

- Generation, collation and archiving of QC documentation
- Management of sample receipt/chain-of-custody processes
- Coordination of maintenance activities for QC equipment
- Management of QC inventory (including ordering)
- Disposal of laboratory waste
- Maintenance of the cleanliness of laboratories (including coordination of glassware washing)
- Daily Calibration/Verification of laboratory equipment (e.g., balances, pH meters, pipettes)
- Preparation and coordination of despatch of samples for external analysis
- Sampling of chemical/allergen raw materials and packaging components (for Components, Chemistry and Biochemistry Labs) in accordance with approved procedures
- Performance of simple analytical tests (e.g., water testing, volumes testing, food/pollen/wasp visual identification tests, components testing)
- Preparation of laboratory reagents in accordance with SOPs and SAMs

Knowledge, Experience & Skills Required

- GCSE in Science, Maths and English with a further science related qualification (e.g A-Level)
- Experience of working in a lab setting either as part of a previous role or a placement
- Able to manage own time and prioritise effectively
- Happy working as part of a team
